

LED Wall Light Instruction Leaflet

PURATI

EN Read this instruction carefully before commencing installation and keep it for future reference.

Always switch off the mains before installation or maintenance.

Keep the product far from heat sources and in a well ventilated area.

The installation or maintenance should be carried out by a qualified electrician.

The light source contained in this luminaire shall only be replaced by the manufacturer or his service agent or a similar qualified person.

Tip: If installing over a cabinet which will interfere with tool access to the securing grub screw. Install entire fitting "upside down". E.g. flip installation bracket 180 degrees so securing screw can be fastened from the top. Note, if installed upside down the fitting will need to be held steady with alternative hand as grub screw is secured.
